Specialty Centers

Departments

Combination of the best specialties for pediatric patients

Mediplex Sejong Hospital that combined specialty of pediatric infection and pediatric respiratory disease with specialty of pediatric heart of ‘Sejong’, the famous institute of heart disease in Korea, is the best hospital that I can trust and rely on for my child.

Pleasant and safe medical environment for children and their caregivers

Associating with a playground not a hospital by arranging familiar character structures to children all over the hospital, we made the hospital interior safe by using cushioned floor material to avoid injury of children.

Treatment room with double soundproof for comfortable treatment as well as separate nursing room was prepared to lessen worry of parents.

Operation of exclusive pediatric ward for only children

More comfortable environment for children was constructed by applying the only floor heating system on general hospital level in Korea.

The wards were constituted mainly with single bed roods for vulnerable children to infection. The positive/negative pressure sick rooms provide further safe care and the access control system was constructed for every wards to prevent kidnapping and missing.

Rehabilitation Center

1

Different from the past focusing on medication and surgical treatment only, rehabilitation program became essential not optional to improve quality of patient's life. Rehabilitation center is a specialized center established targeting for management of life style disease including rehabilitation for musculoskeletal system and cardio cerebrovascular disease.

You can have a new healing experience by providing various treatment rooms capable of intensive care and healing environment optimized for recovery and healing.

Location

Rehabilitation Center is located on the 5th floor.

Major services

- Environment optimized for recovery and healing - healing added design to the concept of treatment
- Customized treatment through consultation and training by rehabilitation specialist qualified with ARDMS-RMSK (American Registry for Diagnostic Medical Sonography-Musculoskeletal Sonography) and clinical sports curer qualified with ACSM-CES (American College of Sports Medicine-Clinical Exercise Specialist)
- Operation of various treatment rooms capable of intensive care by diseases

Treatment program

- Musculoskeletal rehabilitative exercise program, mproving program, hypertension/diabetes/hyperlipidemia control program, articulate reinforcing program, obesity program, child/teenager program, health care program

- Mission & Vision
- Brand Story
- Specialized Centers
- Specialty Centers
- Departments

2

- 1 Medical care in rehabilitation center
- 2 Treatment room in rehabilitation center
- 3 Exercise treatment room for central rehabilitation
- 4 Treatment room for cardiac rehabilitation
- 5 Exercise treatment room for musculoskeletal system

Specialized and systemized practice,

Spine-Joint Center

The Spine-Joint Center providing further specialized and systemized medical practices for spinal/articular disease provides multiangle customized integration therapy from high risk surgery to micro invasive surgery, spinal procedure and rehabilitative treatment through multidisciplinary joint treatment among 5 clinical departments (orthopedics, neurosurgery, rehabilitative medicine, radiology, and anesthesiology). By performing the newest surgical techniques on the basis of advance examination equipment, we endeavor to reduce pain of patients and their recovery rate.

Location

Spine-Joint Center is located on the **1st** floor.

Associated department Orthopedics, Neurosurgery, Rehabilitative Medicine, Radiology

Customized integration treatment

Minimal Invasive Operation Center

1

The minimal invasive operation center performing with the smaller scar within the shortest time tries to provide the best therapy for patients. As the minimal invasive operation leaves smaller injuries from minimized operation site, results in less pain and complication, and brings faster recovery or return to daily, it raises satisfaction of patients. Because it is a minute operation and skilled clinical experience of specialist is very important, the Mediplex Sejong Hospital draws the best therapeutic result through joint treatment with surgical center, Seoul gynecology center, cardiovascular center, cerebrovascular center, and spine and joint center.

Location

Minimal invasive operation center is located on the **6th** floor.

Accurate and detailed diagnosis,

Dementia Special Center

1

This center provides special treatment/management for dementia, a representative degenerative neuropsychiatric disease representing depression, anxiety, aggression, and change of character as well as continuous impaired cognitive functions such as memory, speech, and judgment from acquired causes in an adult who has been functioning normally.

Major services

- Accurate and detailed diagnosis and differential diagnosis system on the university hospital level (the best image diagnosis with High-tech 3 Tesla MRI)
- Examination–diagnosis–care by officially qualified physician on geriatric mental health
- Operation of integrated program for diagnosis and management of dementia
- Medical service system connected with cardio–cerebrovascular center

Location

Dementia Special Center is located in the cardio–cerebrovascular center on the **2nd** floor

Fast and accurate examination and diagnosis,

Physiological Function Test Center

The special examination center, which plays a decisive role in diagnosis and establishment of treatment schedule of cardio-cerebrovascular disease, is located at the end of corridor in the cardio-cerebrovascular center, so can provide rapid examination and diagnosis by connecting each medical offices in the center closely and minimizing movement line of patients.

This center consists of major laboratories (laboratories for echocardiogram, electrocardiogram, active electrocardiogram, Bruce protocol, and pulmonary function test) to diagnose various heart diseases such as myocardial infarction and heart valve disease by assessing health and function of heart and laboratories capable of health and function test of cerebral blood flow (laboratories for neurological test, gradient test, and reading).

Major services

| Cardiac function test | Nerve function test |
|--|--|
| <ul style="list-style-type: none">• Echocardiogram• Electrocardiogram• Ambulatory ECG• Ambulatory blood pressure test• Bruce protocol• Respiratory blood gas analysis | <ul style="list-style-type: none">• Electromyogram• TransCranial Doppler• Cognitive function system• Brainwave test• Evoked potential test• Autonomic nervous system test |

Location

Special Examination Center is on the **2nd** floor.

1 Consultation and treatment of dementia

2 Cerebral blood flow sonography

3 Electrocardiograph

New healing experience you can enjoy in hospital

Departments(1)

Anesthesiology Medicine

This department aims at pain control on various anesthetia. It not only manage pain following surgery but also are responsible for serial processes including response to various situations during operation and resuscitating consciousness of the patient. Especially, this Mediplex Sejong Hospital focusing on severe cardio-cerebrovascular disease also concentrates on other cranial nerve anesthesia, pediatric anesthesia, and geriatric anesthesia, with medical professionals having abundant anesthetic experiences for various complex cardio-vascular disease patients.

- **Major consultation area**

Anesthetics and pain management and general anesthesia

Cardiology

- **Major consultation area**

Coronary artery disease (angina and acute myocardial infarction), aortic disease (aortic aneurysm and aortic dissection), peripheral vascular disease, arrhythmia, heart failure, heart transplantation, pulmonary hypertension, rare incurable disease, cardiomyopathy, valvular disease, hypertension, sudden cardiac death, and myocardial disease

- **Major procedure and surgery**

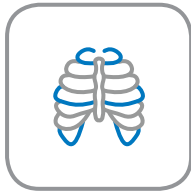

Percutaneous coronary arterial intervention, complex challenging intervention, radiofrequency catheter ablation, pacemaker insertion, peripheral vascular intervention, and percutaneous left atrial occlusion

- **Associated Clinic**

Congenital heart disease Clinic, Peripheral vascular Clinic, Heart failure Clinic, Rare disease and Genetic Clinic

- **Associated center**

Cardiovascular Center, Minimal invasive operation Center, Physiological function test Center

Cardiothoracic Surgery

■ Major consultation area

Procedure and surgery of blood vessel associated acute and chronic complication (blockage), thoracic/abdominal aorta surgery, catheter related surgery, hemodialysis/peritoneal dialysis related surgery, arteriosclerosis, deep vein thrombosis, varicose vein, and diabetic foot

■ Major procedure and surgery

- Procedure and surgery of blood vessel associated acute and chronic complication (blockage)
- Thoracic/abdominal aortic procedure and surgery
- Arteriosclerosis and diabetic foot procedure and surgery
- Hemodialysis (peritoneal dialysis) procedure and surgery
- Varicose vein procedure and surgery
- Deep vein thrombosis procedure and surgery
- Catheter related procedure and surgery

■ Associated clinic

Vascular complication and Blockage Clinic, Aorta Clinic, Arteriosclerosis and diabetic foot Clinic, Hemodialysis Clinic, Varicose vein Clinic, Deep vein thrombosis Clinic, Catheter Clinic

■ Associated center

Cardiovascular Center, Physiological function test Center

Dentistry

■ Major consultation area

General prosthesis, esthetic prosthesis, implant prosthesis, periodontal prosthesis, and dental geriatrics

■ Major procedure and surgery

- Implant: Implantation, alveolar transplantation, maxillary sinus augmentation, and special prosthesis
- Eusthetic treatment: Resin inlay, ceramic inlay, laminate, ceramic crown, defective prosthesis replacement, dental bleaching, and dental plasty
- General prosthesis: Gold inlay, gold crown, overdenture, partial denture, and special denture
- Periodontal therapy: Scaling, periodontal abrasion, gingival desquamation abrasion

■ Associated clinic

Implant Clinic, Esthetic treatment Clinic

■ Associated center

Surgery Center

New healing experience you can enjoy in hospital

Departments(2)

Emergency Medicine

- **Major consultation area**
Emergency medicine and critical care medicine
 - **Major procedure and surgery**
Cardiopulmonary resuscitation, airway intubation, chest tube insertion, suture and wound care, echocardiogram and procedure, abdominal ultrasound, acute tracheotomy, acute cricothyroidotomy, closed reduction of fracture and external fixation
 - **Associated center**
Emergency medical Center
-

Endocrinology

- **Major consultation area**
Diabetes, Thyroid, and Osteoporosis
 - **Major procedure and surgery**
Diabetic education and consultation, Thyroid echgram
 - **Associated clinic**
Diabetes Clinic, Thyroid Clinic
 - **Associated center**
Internal medicine Center
-

Gastroenterology

- **Major consultation area**
Colon disease (constipation, indigestion, irritable colon syndrome, polyp, colon cancer, inflammatory colon disease), endoscopic therapy, pancreatic disease, cholecystic and biliary disease, diagnosis and anticancer therapy of pancreatic/biliary/cholecystic cancer, hepatic disease, gastric/colon disease, upper gastrointestinal disease (stomach, esophagus, and duodenum).
- **Major procedure and surgery**
Cholangiopancreatography, endosonoscope, endoscopy/colonoscopy, polypectomy, therapeutic endoscopy, upper endoscopic tumorectomy
- **Associated clinic**
Gastric-colon disease Clinic, Hepatic disease Clinic
- **Associated center**
Internal medicine Center, Endoscopy Center

General Surgery

■ Major consultation area

Upper and lower gastrointestinal surgery, hepatopancreaticobiliary surgery, benign anal disease, breast and thyroid disease, hernia, trauma, burn, single port laparoscopic surgery

■ Major procedure and surgery

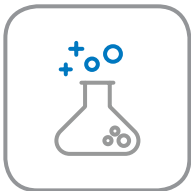

Ultrasound, endoscopy and colonoscopy, laparoscopic stomach and colon cancer surgery, laparoscopic cholecystectomy and splenectomy, hemorrhoid surgery, breast tumor surgery, endoscopic thyroidectomy, laparoscopic hernia surgery, abdominal trauma surgery, antipyretic surgery (acute phase/scar removal surgery), single port laparoscopy

■ Associated Clinic

Endoscopy and laparoscopy Clinic, Antipyretic Clinic, Anal disease Clinic

■ Associated center

Surgery Center, Minimal invasive operation Center

Laboratory Medicine

■ Major consultation area

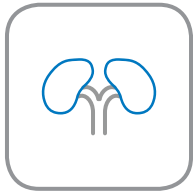

General operation of laboratory, quality control, clinical microbiology, diagnostic hematology, and transfusion medicine

■ Major procedure and surgery

Establishment of diagnostic test quality control, training and management supervision, general verification, examination reading (peripheral blood smear, body fluid, EP, and microbial colony read) transfusion reaction assessment, outsourcing test management and oversight, and onsite test management and oversight

New healing experience you can enjoy in hospital

Departments(3)

Nephrology

- **Major consultation area**
Chronic renal failure, urinary tract infection
 - **Major procedure and surgery**
Hemodialysis, peritoneal dialysis
 - **Associated facility**
Hemodialysis Room
-

Neurological Surgery

- **Major consultation area**
Stroke (cerebral hemorrhage and cerebral infarction), cerebral aneurysm, cerebrovascular and intravascular surgery (neural intervention), headache, dizziness, spinal disease (discopathy, and compression fracture), cranial and neural trauma
- **Major procedure and surgery**
Intravascular surgery (neural intervention, vascular stenosis stent insertion, cerebral aneurysm, coil embolization, and acute cerebral infarction thrombolysis)
- **Associated clinic**
Stroke Clinic, Spinal Clinic
- **Associated center**
Cerebrovascular Center, Spine-Joint Center, Minimal invasive operation Center, Physiological function test Center

Neurology

■ Major consultation area

Stroke (cerebral hemorrhage and cerebral infarction) cerebrovascular stenosis, dizziness, headache, dementia, Parkinson's disease, epilepsy, encephalopathy, peripheral nerve disorder, central nerve system infection, neurodegenerative disorder

■ Major procedure and surgery

Cerebral blood flow, carotid ultrasound, peripheral arteriosclerosis test, cognitive function test, brain wave test, electromyogram, trigger point injection (TPI), peripheral nerve ultrasound and injection therapy

■ Associated clinic

Stroke and cerebrovascular Clinic, Muscle and peripheral nerve Clinic, Headache and dizziness Clinic, Dementia Clinic, Cognitive health Clinic, Parkinson's disease and abnormal movement disorder Clinic, and Epilepsy Clinic

■ Associated center

Cerebrovascular Center, Physiological function test Center

Obstetrics & Gynecology

■ Major consultation area

Gynecological disease (uterine myoma, endosalpingoma, and ovarian tumor), infertility (polycystic ovarian syndrome, habitual abortion), gynecological cancer screening

■ Major procedure and surgery

In vitro fertilization, artificial fertilization, hysteroscopic surgery, single port laparoscopic surgery

■ Associated clinic

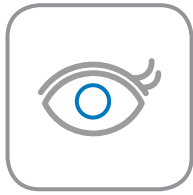

Subfertility Clinic, Genecology Clinic, Climacterium Clinic

■ Associated center

Seoul women's Center, Minimal invasive operation Center

New healing experience you can enjoy in hospital

Departments(4)

Ophthalmology

- **Major consultation area**
Cornea, anterior segment disease, dry eye, retina, vitreous body, cataract, glaucoma, squint, pediatric ophthalmology, and neuro-ophthalmology
 - **Major procedure and surgery**
Ultra sonic cataract surgery, intraocular injection, retinal laser, and late cataract laser
 - **Associated Clinic**
Anterior segment disease, Retina Clinic, Glaucoma Clinic, Squint and pediatric ophthalmology Clinic
 - **Associated center**
HanGil Eye Center
-

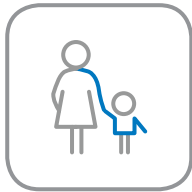

Orthopedic

- **Major consultation area**
Traumatic fracture, artificial joint, limb disease
 - **Major procedure and surgery**
Osteoarticular surgery, total joint replacement, surgical treatment of diabetic foot and prosthetic prescription
 - **Associated center**
Spine-Joint Center, Rehabilitation Center
-

Otolaryngology

- **Major consultation area**
Tonsil/adenoid surgery, Thyroid tumor, Salivary gland tumor, Rhinitis, Sinusitis, Hearing loss, and Hearing aid
- **Major procedure and surgery**
 - Otolary: Ventilation tube insertion
 - Rhinology: Septoplasty, conchoidal reduction, endoscopic sinusitis surgery, sleep apnea surgery, and rhinoplasty
 - Head and neck surgery: Vocal cord polyp removal, correction of husky voice from vocal cord paralysis, salivary gland lithotomy, oral, salivary gland, and thyroid tumor removal
- **Associated center**
Surgery Center, Minimal invasive operation Center

Pediatric & Juvenile

■ Major consultation area

Pediatric infectious disease, fever disease, vaccination, pediatric respiratory disease, allergy, asthma, atopy, general pediatric heart disease (pediatric arrhythmia, pediatric heart failure, pediatric intensive care, juvenile and adult congenital heart disease), pediatric heart intervention, and fetal echocardiography

■ Major procedure and surgery

General echocardiogram (transthoracic echocardiogram), special echocardiogram (transesophageal echocardiogram, 3 dimensional echocardiogram, intraoperative echocardiogram), percutaneous valve intervention, percutaneous cardiovascular intervention, pericardiocentesis, intracardiac catheterization, invasive coronary artery inspection (coronary artery angiography), transient pace maker insertion

■ Associated clinic

Pediatric cardiac intervention Clinic, Pediatric arrhythmia Clinic, Juvenile and adult congenital heart disease Clinic, Kawasaki Clinic

■ Associated center

Pediatric And Youth Center

Psychiatry

■ Major consultation area

Dementia, Depression and anxiety disorder, Cognitive disorder, Mood disorder, and General psychiatry

■ Major procedure and surgery

Dementia treatment, Cognitive behavior treatment, Neuropsychology test

■ Associated clinic

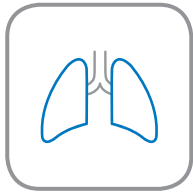

Dementia Clinic, Depression Clinic, Adjustment disorder and Stress Clinic, Cognitive behavior treatment Clinic

■ Associated Center

Cerebrovascular Center, Dementia special Center

New healing experience you can enjoy in hospital

Departments(5)

Pulmonology

- **Major consultation area**
Respiratory disease (asthma, chronic obstructive pulmonary disease, and pneumonia)
 - **Major procedure and surgery**
Bronchus endoscopy, thoracic ultrasound, pulmonary function test (simple/complex), bronchial challenge test
 - **Associated clinic**
Asthma Clinic, Chronic obstructive pulmonary disease Clinic, Pneumonia Clinic
 - **Associated center**
Internal medicine Center
-

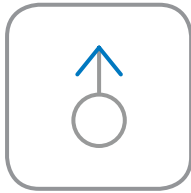

Radiology

- **Major consultation area**
Cranial nerve radiology, Craniocervical region, cardiovascular region, musculoskeletal region, Abdomen
 - **Major procedure and surgery**
Interventional therapy on cerebrovascular, vascular and bile duct disease, percutaneous abscess drainage, Fine needle aspiration biopsy, Intervention
-

Rehabilitation Medicine

- **Major consultation area**
Central nervous rehabilitation, musculoskeletal (spine and shoulder) rehabilitation
- **Major procedure and surgery**
Central nervous system rehabilitation treatment, Neural musculoskeletal ultrasound, Pain intervention surgery, Orthotherapy (manipulation), Heart and sports rehabilitation treatment
- **Associated center**
Rehabilitation Center, Cardiovascular Center, Cerebrovascular Center, Spine-Joint Center

Urology

■ Major consultation area

Prostate Disease, Dysuria, Genito-Urinary Infectious Disease, Urolithiasis, Andrology, and Urological Tumor

■ Major procedure and surgery

- Major procedure : Urinary ultrasound, extracorporeal shock wave lithotripsy, prostatic biopsy, cystoscopy and biopsy, double J stent insertion
- Major surgery : Vasectomy, circumcision, partial neurectomy of dorsal penile nerve, foreign body removal, transurethral prostatectomy, transurethral bladder tumor resection, endoscopic urinary track lithotomy, scrotum surgery

■ Associated clinic

Prostate Clinic, Dysuria Clinic, Urinary tract infection Clinic, Urolithiasis Clinic, Men's sexual function Clinic, Urological tumor Clinic

■ Associated center

Surgery Center, Minimal invasive operation Center
